Raised with limited peer interaction, Ernestine St Bennett has difficulty interpreting social cues. At twenty-five she's become a loner; a shy nerd immersed in her scientific studies, whose best friend is her pet fish, Waldo. Then Ernestine meets Simon Prime, who's obviously a nerd, too! Sympathizing with his social dysfunction, Ernie decides to help poor Simon increase his self-esteem and thus enhance his social standing. Using principles learned in her fish studies, she'll simply turn Simon from meek to macho. What Ernestine doesn't know (but Waldo suspects) is that Simon Prime is really ex-cop, private investigator Sam Pierce in disguise. A man who definitely doesn't need his masculinity enhanced!

### Manuals

In this pathbreaking and provocative new treatment of some of the oldest dilemmas of psychology and relationship, Gordon Wheeler challenges the most basic tenet of the West cultural tradition: the individualist self. Characteristics of this self-model are our embedded yet pervasive ideas that the individual self precedes and transcends relationship and social field conditions and that interpersonal experience is

somehow secondary and even opposed to the needs of the inner self. Assumptions like these, Wheeler argues, which are taken to be inherent to human nature and development, amount to a controlling cultural paradigm that does considerable violence to both our evolutionary self-nature and our intuitive self-experience. He asserts that we are actually far more relational and intersubjective than our cultural generally allows and that these relational capacities are deeply built into our inherent evolutionary nature. His argument progresses from the origins and lineage of the Western individualist self-model, into the basis for a new model of the self, relationship, and experience out of the insights and implications of Gestalt psychology and its philosophical derivatives, deconstructivism and social constructionism. From there, in a linked series of experiential chapters, each of them a groundbreaking essay in its own right, he takes up the essential dynamic themes of self-experience and relational life: interpersonal orientation, meaning-making and adaptation, support, shame, intimacy, and finally narrative and gender, culminating in considerations of health, ethics, politics, and spirit. The result is a picture and an experience of self that is grounded in the active dynamics of attention, problem solving, imagination, interpretation, evaluation, emotion, meaning-making, narration, and, above all, relationship. By the final section, the reader comes away with a new sense of what it means to be human and a new and more usable definition of health.

With a Queen of Heart embedded up a symbolic sleeve of the poorly written pages of thematic arts, uttered in the black hills of controversial words, echoing the need for a home and spiritual eyes, Mikey lost his way and walked the streets of Hollywood. He spat in the milk of growing children and pulled his pud in front of nursing mothers, who sat out front of Starbucks, sipping non-fat lattes. Mikey had one ambition and one ambition only, he was writing a book titl-ed, "The Adventures In The Unleashing of Conventional Modes of Perception & Behavior," only he had no intention of ever putting pen to paper or fingers to key-boards. No, Mikey was the living pages of the title of his book, and it all started with a commercial and a bowl of cereal called LIFE that he was manipulated into peddl-ing onto the rest of the world.

Learn the art--and science--of risk management In this exceptionally lucid, accessible book, one of the most highly regarded industry experts illuminates the delicate process of making decisions in an uncertain world and helps both lay people and professional risk managers understand the role of "risk-management" in their work, their lives, and their businesses. This book will enable professional risk managers to truly grasp the concepts behind their tools, and it will enable their clients (investors) and their coworkers to understand them as well. Handy and easy-to-read, The Book of Risk provides a down-to-earth look at an exciting field that has practical applications for everyone. Dan Borge, PhD (Clinton Corners, NY), was managing director and partner at Bankers Trust Company. He was with Bankers Trust for the last twenty years and was the architect of the first-ever risk management system implemented institutionally--Bankers Trust's renowned RAROC system. Prior to working at Bankers Trust, he designed airplanes at Boeing. He is an aeronautical engineer and has a PhD in finance from Harvard Business School.
