"Tony Wagner and venture capitalist Ted Dintersmith call for a complete overhaul of the function and focus of American schools, sharing insights and stories from the front lines, including profiles of successful students, teachers, parents, and business leaders. [The book proposes] a new vision of American education, one that puts wonder, creativity, and initiative at the very heart of the learning process and prepares students for today's economy"--

Srikumar Rao teaches the most popular course at the Columbia Business School in New York. Meant to help future business leaders define their personal ethics and goals, it's a forum for self-exploration. Dr Rao offers his students ways to think about situations that will confront them, as well as ways to deal with them, and he does this using a mixture of stories, exercises, discussions and other thought-provoking techniques. For example, the students are asked, over the course of a week, to eat at least one meal a day alone and in silence, to sharpen focusing skills. In another exercise, they are asked to hold conversations with fellow classmates while blindfolded to become acquainted on more than a superficial level. In another assignment, on the subject of networking, they are asked to help five people they admire without any expectation of repayment... The subject of a New York Times profile, Dr Rao frequently finds that his students finish his course with a greater sense of integrity and of the values they wish to live by, and yet still have the skills to lead successful lives. Now, for the first time, Rao's course is available to a far wider audience in this accessible, ground-breaking and unconventional guide to life, and how to live it in a more meaningful way.

You are a success project, you should succeed regardless of your circumstances. Success is a science, everyone can learn and benefit from it. There are principles that make success possible for anyone who applies them. Success does not discriminate - it is available to anyone who understands and applies its principles. SUCCEED REGARDLESS shares the seven principles of success. Are you ready to succeed regardless?

Do you tell your preschooler one thing and they do the opposite? Are they easily distracted or unable to focus? If you suspect that your child may have a learning problem--or if you simply want to help them be ready--here is the book to read before he or she enters the school system: a realistic, humorous, and kind-hearted guide to helping your little one learn. In Ready to Learn, Stan Goldberg draws on thirty years of clinical experience (and personal experience as the father of two kids with learning differences) to provide an easy-to-use guide to helping children overcome any problems and improve their learning skills. Illustrating his discussion with many anecdotes about teaching both his own children and children in his private practice, Goldberg walks readers through the process of learning and shows how to identify a learning problem. He focuses on four major areas--problems of attention, understanding, storage, and retrieval--presenting each problem through the eyes of the child, in everyday terms that a parent can understand. He looks at seven down-to-earth strategies that will allow you to help your child overcome their problem and he provides many handy charts and figures that will help you organize your efforts. The book also includes a list of useful web sites and a chart of development milestones, outlining motor skills, cognitive-sensory skills, and language and social skills. Written in a style that blends humor, insightful stories, and practical experience, Ready to Learn provides a flexible, time-tested approach, using step-by-step strategies that will help your preschoolers become confident and love learning--before they enter the classroom.

Do you ever wonder how some people make success look so simple? In Succeed, award-winning social psychologist Heidi Grant Halvorson offers counterintuitive insights, illuminating stories, and science-based information that can help anyone: • Set a goal to pursue even in the face of adversity • Build willpower, which can be strengthened like a muscle • Avoid the kind of positive thinking that makes people fail Whether you want to motivate your kids, your employees, or just yourself, Succeed unlocks the secrets of achievement, and shows you how to create new possibilities in every area of your life.

Everything we know about the world today follows an invisible set of rules--how we work, love, parent, spend our money, and define success. But what if we could remove these outdated ideas and start anew? What would our lives look like if we could redefine the meaning of happiness, purpose, and success? The Code of the Extraordinary Mind blends computational thinking, integral theory, modern spirituality, evolutionary biology, and a little bit of humor to provide a revolutionary framework for re-coding ourselves with new, empowering beliefs and behaviors so we can live extraordinary lives. Throughout, Vishen Lakhiani shares transformative insights from legendary thinkers including Elon Musk, Richard Branson, and Arianna Huffington, among others, helping us to think like the greatest creative minds of our era--questioning, challenging, and creating new rules for our lives. Lakhiani's 10 laws help us restrain our minds to grow and achieve more than we ever thought was possible, showing us that we do not need to follow convention and can succeed on our own terms no matter where we are starting from.
