Corben ' s and Stehle's and Goldstein's books were first published about 1950. All three had their strengths and weaknesses, but Goldstein's was the most widely used in graduate schools. However, Corben and Stehle's book nicely complimented Goldstein's book, especially where the first edition of Goldstein's book was weak or in error.

Applications not usually taught in physics courses include theory of space-charge limited currents, atmospheric drag, motion of meteoritic dust, variational principles in rocket motion, transfer functions, much more. 1960 edition.

Essential reading for anyone interested in life behind-the-scenes at Formula One. Formula One Grand Prix mechanic Steve Matchett takes the reader on a compelling journey through his life in the pit-lane, from his beginnings as a young apprentice, through his time at Ferrari and BMW to his later success with Benetton. He gives eye-witness views of the great drivers, including Michael Schumacher, Nigel Mansell, Alain Prost and Ayrton Senna. He also talks of key Benetton personalities, and explains how the team was transformed into a strong, competitive organisation, winning three World Championships. His determination and frustration in trying - and eventually succeeding - to break into the high-pressure world of Formula One leaps off the page.

Revision of the best selling introduction to acoustion, appropriate for physics of Sound/ Musical acoustics for young adults. New edition stresses modern instruments.

This classic presentation has never been superseded in its encyclopedic coverage of the subject, and its excellent exposition of fundamental theorems, equations, and detailed methods of solution. Topics include many aspects of the dynamics of liquids and gases and 3-dimensional problems on motion of solids through a liquid. 1932 edition.

"Copyright Renewals 1978" by Library of Congress. Copyright Office. Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten – or yet undiscovered gems – of world literature, we issue the books that need to be read.
