The five different layers in earth  
atmosphere are Troposphere,  
Stratosphere, Mesosphere, Thermosphere  
and Exosphere. They are explained as  
follows • Troposphere: This layer is very  
near to the earth surface. In this air  
temperature decreases as the height  
increases. Most of the air mass is consisted  
in this layer only.

## Earth Science Geology, the Environment, and the Universe

Geology is the primary Earth science. The word means "study of the Earth." Geology deals with the composition of Earth materials, Earth structures, and Earth processes. It is also concerned with the organisms of the planet and how the planet has changed over time. Geologists

search for fuels and minerals, study natural hazards, and work to protect Earth's environment.

What is Earth Science? | Geology.com  
Environmental Earth Sciences is an international multidisciplinary journal concerned with innovative approaches and significant aspects of interaction between humans, natural resources or unique geographic zones, with emphasis on the solid earth. In pursuit of these topics, the geoscientific community is invited to contribute their knowledge and experience.

Earth Science Geology, the Environment,  
and the Universe ...

Environmental Science provides an overview of how science affects our environment. We focus on interactions between the solid Earth, its water, its air and its living organisms, and on dynamic, interdependent relationships between these four components. Earth and environmental scientists also consider how these relationships produce environmental change at different timescales.
