fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

Seamlessly bridging academic accounting with real-life applications,

Crash Course in Accounting and Financial Statement Analysis, Second Edition is the perfect guide to a complete understanding of accounting and financial statement analysis for those with no prior accounting background and those who seek a refresher.

Business Accounting has been developed specifically for the needs of non-specialist students studying accounting as part of another degree. The authors explain the key concepts clearly and concisely, using examples, cases and real company data to contextualise the theory. Ethics, corporate governance and corporate social responsibility is given more prominence in this new edition and a new chapter on the statement of cash flows has been added. The number of questions in the book and online has been increased substantially to provide students with more opportunity to test their
