Taking advances in modern communication and the new eagerness for power from the bottom upwards, Adam Roberts has produced a novel that is at once an exciting war novel and a philosophical examination of war and democracy. It shows one of the UKs most exciting and innovative literary voices working at the height of his powers and investing SF with literary significance that is its due.

Now readers can master the fundamentals of electric circuits with Kang's ELECTRIC CIRCUITS. Readers learn the basics of electric circuits with common design practices and simulations as the book presents clear step-by-step examples, practical exercises, and problems. Each chapter includes several examples and problems related to circuit design, with answers for odd-numbered questions so learners can further prepare themselves with self-guided study and practice. ELECTRIC CIRCUITS covers everything from DC circuits and AC circuits to Laplace transformed circuits. MATLAB scripts for certain examples give readers an alternate method to solve circuit problems, check answers, and reduce laborious derivations and calculations. This edition also provides PSpice and Simulink examples to demonstrate electric circuit simulations. For most clients with a trauma history, especially those grappling with dissociation, living inside their own skin is challenging. Most clients struggle between sessions, needing the connection to the therapist in order to feel contained. Our trauma clients tread water between therapy sessions, often feeling incapacitated and lost in figuring out a way to help themselves. The results of therapy once or twice a week can fade quickly when faced with the rest of the hours of a week besieged with overwhelming anxiety or despair. The skills in this manual are the foundation of the Becoming Safely Embodied experiential skill set developed to help clients learn step by step ways of being with themselves, especially when they are on their own, between therapy sessions. Nine easy to learn skills are presented and can easily be taught in a group format or to individual clients. Described for groups, the skills can be used individually. In addition there is curriculum for how to open and close the group.
