The Ultimate Computer Repair Guide Remove the side panel of the tower system or the cover if you have a desktop. Place the panel in a safe place well out of the way. Before touching anything inside the system unit, remove electrical static charge from your body by touching a door knob or any unpainted metal surface.

The Ultimate Computer Repair Guide - St0rage.org

Laptop loose connections are less likely, but if you've recently installed new memory it's worth making sure that you've firmly connected it. 2. Check your laptop battery. If you're running your laptop off its battery, try plugging it into the mains power – if it works fine off the mains, it's probably time for a new battery. 3. Start up in Safe Mode
