Datacenter (SDDC) VMware's breakthrough Software-Defined Datacenter (SDDC) initiative can help you virtualize your entire datacenter: compute, storage, networks, and associated services. Central to SDDC is VMware Virtual SAN (VSAN): a fully distributed storage architecture seamlessly integrated into the hypervisor and capable of scaling to meet any enterprise storage requirement. Now, the leaders of VMware's wildly popular Virtual SAN previews have written the first authoritative guide to this pivotal technology. You'll learn what Virtual SAN is, exactly what it offers, how to implement it, and how to maximize its value. Writing for administrators,

consultants, and architects, Cormac Hogan and Duncan Epping show how Virtual SAN implements both object-based storage and a policy platform that simplifies VM storage placement. You'll learn how Virtual SAN and vSphere work together to dramatically improve resiliency, scale-out storage functionality, and control over QoS. Both an up-to-the-minute reference and hands-on tutorial, Essential Virtual SAN uses realistic examples to demonstrate Virtual SAN's most powerful capabilities. You'll learn how to plan, architect, and deploy Virtual SAN successfully, avoid gotchas, and troubleshoot problems once you're up and running. Coverage includes Understanding the key

This definitive field guide is the only guide to use a fully integrated photographic approach to profile the extraordinary range of birds found in eastern North America. The highest-quality photography brings nearly 500 species to life on the page, capturing their beauty and making identification quick and effortless. The 393 species most commonly seen east of the 100th Meridian (in the United States,

the region east of the Rocky Mountains) are featured in full-page profiles that emphasize all the information needed to identify them. Diagnostic photographs are silhouetted and clearly annotated, and any plumages, whether female, juvenile, subspecies, and winter or summer, that differ noticeably from the primary image are also included and labeled accordingly. Detailed similar species boxes show the plumage that is most similar—in some cases the female or juvenile rather than the featured adult—and the most significant differences are picked out. Stunning context photographs show the bird at home, in its normal habitat or performing behavior that is typical of that

species. Schematic artworks show the shape and posture of the bird in flight as well as its coloration, and a diagram of its flight pattern is also included. The border of Texas and Mexico is a popular destination because of the many species that can be seen nowhere else in eastern North America. The 60 most common of these southern gems are profiled in their own section of quarter-page entries, each with a stunning photograph annotated to point out the most significant field marks. A separate section profiles 44 species that are particularly uncommon or local in their distribution.

medieval world through twelve manuscripts, from one of the world's leading experts. Winner of The Wolfson History Prize and The Duff Cooper Prize. A San Francisco Chronicle Holiday Book Gift Guide Pick! Meetings with Remarkable Manuscripts is a captivating examination of twelve illuminated manuscripts from the medieval period. Noted authority Christopher de Hamel invites the reader into intimate conversations with these texts to explore what they tell us about nearly a thousand years of medieval history - and about the modern world, too. In so doing, de Hamel introduces us to kings, queens, saints, scribes, artists, librarians, thieves, dealers, and collectors. He traces the

elaborate journeys that these exceptionally precious artifacts have made through time and shows us how they have been copied, how they have been embroiled in politics, how they have been regarded as objects of supreme beauty and as symbols of national identity, and who has owned them or lusted after them (and how we can tell). From the earliest book in medieval England to the incomparable Book of Kells to the oldest manuscript of the Canterbury Tales, these encounters tell a narrative of intellectual culture and art over the course of a millennium. Two of the manuscripts visited are now in libraries of North America, the Morgan Library in New York and the Getty Museum in Los
