Pharmako/Poeia. Plant Powers, Poisons and Herbcraft. Dale Pendell. A book review by Gyrus / Posted 17 May 2008. What makes a good map? How should it be formed to guide us through strange terrain? Naturally, it should be abbreviated, compacted, abstracted to a certain degree; a map as big as the land it describes is useless. Crucially, its shape ...

***This paperback edition has a new introduction by the author and updated content. This is the first volume of North Atlantic Books' updated paperback edition of Dale Pendell's Pharmako trilogy, an encyclopedic study of the history and uses of psychoactive plants and related synthetics first published between 1995 and 2005. The books form an interrelated suite of works that provide the reader with a unique, reliable, and often personal immersion in this medically, culturally, and spiritually fascinating subject. All three books are beautifully designed and illustrated, and are written with unparalleled authority, erudition, playfulness, and range. Pharmako/Poeia: Plant Powers, Poisons, and Herbcraft includes a new introduction by the author and as in previous editions focuses on familiar psychoactive plant-derived substances and related synthetics, ranging from the licit (tobacco, alcohol) to the illicit (cannabis, opium) and the exotic (absinthe, salvia divinorum, nitrous oxide). Each substance is explored in detail, not only with information on its history, pharmacology, preparation, and cultural and esoteric correspondences, but also the subtleties of each plant's effect on consciousness in a way that only poets can do. The whole concoction is sprinkled with abundant quotations from famous writers, creating a literary brew as intoxicating as its subject. The Pharmako series is continued in Pharmako/Dynamis (focusing on stimulants and empathogens) and Pharmako/Gnosis (which addresses psychedelics and shamanic plants).

"Pharmako gnosis: plant teachers and the poison path focuses on plant-based and derivative psychedelic "teachers" (including ayahuasca, peyote, LSD, and DMT) and on the "poison path" of substances such as belladonna, ketamine, and ibogaine"--Provided by publisher.

"A global pandemic kills much of mankind in 2021--more than two hundred million die in the U.S. in the first month alone. Dale Pendell's The Great Bay: Chronicles of the Collapse takes us on an unprecedented journey sixteen thousand years into the future of mankind--a future transformed by the warming of the planet and the flooding and climatic changes that results around the world. While Pendell's scope is vast, the imaginative and thought-provoking stories in The Great Bay focus on the lives of people in what was once California, where rising sea levels have formed a great bay in the heart of the state. These stories are not merely a warning--they show how people rediscover the old ways of living and surviving, and the world that emerges is as much utopian as dystopian."-- Publisher description.

Describes the author's experience at Burning Man, an annual arts festival in the Black Rock Desert of Nevada, using poetry, anecdotes, dialogue, and sociological and historical observations.

How historical, social, and cultural forces shaped the psychedelic experience in midcentury America, from CIA experiments with LSD to Timothy Leary's Harvard Psilocybin Project. Are psychedelics invaluable therapeutic medicines, or dangerously unpredictable drugs that precipitate psychosis? Tools for spiritual communion or cognitive enhancers that spark innovation? Activators for one's private muse or part of a political movement? In the 1950s and 1960s, researchers studied psychedelics in all these incarnations, often arriving at contradictory results. In American Trip, Ido Hartogsohn examines how the psychedelic experience in midcentury America was shaped by historical, social, and cultural forces--by set (the mindset of the user) and setting (the environments in which the experience takes place).

- Explains how to work with baneful herbs through rituals and spells, as plant spirit familiars, as potent medicines, and as visionary substances
- Details the spiritual, alchemical, astrological, and symbolic associations of each plant, its active alkaloids, how to safely cultivate and harvest it, and rituals and spells suited to its individual nature and powers
- Shares plant alchemy methods, magical techniques, and recipes featuring the plants, including a modern witches' flying ointment

Part grimoire and part herbal formulary, this guide to the Poison Path of occult herbalism shares history, lore, and practical information regarding the use of poisonous, consciousness-altering, and magical plants. Author Coby Michael explains how, despite their poisonous nature, when approached with respect and reverence, baneful herbs can become powerful plant allies, offering potent medicine, magical wisdom, and access to altered states and the spirit realm. Detailing the spiritual, alchemical, astrological, and symbolic associations of each plant, the author explores their magical uses in spells and rituals throughout history as well as their active alkaloids. He focuses primarily on the Nightshade family, or Solanaceae, such as Mandrake, Henbane, and Thornapple, yet also explores baneful plants from other families such as Wolfsbane, Hemlock, and Hellebore. He also examines plants in the witch's pharmacopoeia that are safer to work with but just as chemically active, such as Wormwood, Mugwort, and Yarrow. The author shares rituals suited to the individual nature and powers of each plant and explains how to attract and work with plant spirit familiars. He offers plant alchemy methods for crafting spagyric tinctures and magical techniques to facilitate working with these plants as allies and teachers. He shares magical recipes featuring the plants, including a modern witches' flying ointment. He also explores safely cultivating baneful herbs in a poison garden. Revealing the magical secrets of the Poison Path, Coby Michael shows that although these plants can be deadly in nature, they are also wise spiritual teachers who can provide us with profound healing and bring us closer to the natural world.
