This course is a comprehensive guide to the principles of producing a set of financial accounts. It begins by clearly explaining the debit and credit convention, using a unique learning technique and demonstrating how to carefully analyse a transaction and decide how it should be recorded. The update of the nominal ledger and production of a trial balance is then carefully explained, before illustrating how the trial balance is used to produce a Profit and Loss Statement and Balance Sheet.

This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields.

~~Free Accounting Books Download | Ebooks Online Textbooks~~

Whilst there is currently no universally standardised accepted accounting principles, there are various accounting frameworks which set the standard body. The most common accounting principle frameworks used are IFRS, UK GAAP, and US GAAP. There are both similarities and differences between these three frameworks, where GAAP is more rule-based whilst IFRS is more principle based.
