Shares insights and wisdom about childhood education, focusing on the character and intellect-building aspects of learning.

Genius is not just about intelligence and aptitude, it's also a word that embodies our inner soul, nature, or character. In this illuminating book, a former principal and father shares heartwarming stories and wise advice that offers a rare insight into children and the process of education. The Genius in Every Child celebrates the moments in the lives of children, their parents, and their teachers. The stories of unique characters in action illustrate some of the principles of education and the disciplines we need to be good stewards of our children's character and intellect. The vignettes provide both delight and enjoyment in the miracle of it all, and perspective and solace in the difficulty of it all, encouraging parents and teachers to work hand-in-hand. This book urges parents to focus on the long run, entrusting the trials, struggles, and sufferings of the short run to the kids. It proposes a shift in focus from test scores to enthusiasm, from perfect behavior to learning from mistakes, from measuring up to making something of yourself, from independence to interdependence, from goodness to integrity, from fear to love. The value of this experience to hundreds of children, parents, and teachers derives from the depth of Rick Ackерly's perception and the subtlety of his understanding. He offers perspective and guidance on a wide range of challenges faced by parents of today's school-aged children, including: self-confidence, discipline, boundary-setting, building character, integrity, taking responsibility, facing challenges, handling disappointment, peer pressure, reading, homework, academic achievement, failure, and success. [Excerpt] Mr. Rick's Words of Wisdom Children need teachers at school and parents at home. Failure is at least as powerful an educator as success. Kids need consequences and they need forgiveness We put our kids at risk by trying to engineer their success. Our children need us to have confidence in them. The core of building character is taking responsibility. If we are open to the surprise, we can let them educate us.

Presents advice for parents coping with child rearing issues, including first day of school, discipline, separation from paretns, peer pressure, dyslexia, and more.

"Creative genius moves students beyond lower-level thinking skills, like fact recall, and stimulates them to make new connections, think beyond the obvious, and find the possible within the impossible."--back cover.

"Every student is a genius," declares author Thomas Armstrong, and an educator's most important job is to discover and nurture the "genius qualities" that all students were born with but that may no longer be obvious. Urging readers to look beyond traditional understandings of what constitutes genius, Armstrong describes 12 such qualities: curiosity, playfulness, imagination, creativity, wonder, wisdom, inventiveness, vitality, sensitivity, flexibility, humor, and joy. He cites research in various fields that supports this broader understanding of genius and explains how influences in the home, the popular media, and the school itself "shut down" the genius in students. Combining thoughtful insights and practical information, Armstrong offers guiding principles to help educators awaken genius in the classroom--beginning with awakening the genius in themselves. Readers will find dozens of suggested activities and helpful resources to provide "genius experiences" and create a "genial climate" in the classroom. In addition, suggestions for further study at the end of each section provide starting points for personal and professional reflection and growth. As it celebrates the potential brainpower waiting to be unlocked in classrooms everywhere, Awakening Genius in the Classroom inspires educators to look at their students from a different perspective and to reinvigorate their teaching with a new sense of excitement and possibility. The result, Armstrong concludes, could extend far beyond the classroom and transform not only our schools, but the entire world.

We all want our child to be the best they can be, but how can we discover and encourage their natural talents? Clinical psychologist Andrew Fuller believes that every child has an innate sense of inquisitiveness, creativity and lateral thinking that forms the basis of genius. However, social conditioning and school life can lead to a desire to conform and fit in which can squash their curiosity. For parents and grandparents, Andrew Fuller's new book holds the way to unlock their child's genius. No the answer is not homework, more after school tutoring or blaming the school. Yes the answer is thinking, talking and listening, and delightfully making mistakes together. Covering the age range of 2 to 18, Andrew draws on the latest research and his own extensive work with thousands of children in private practice. He shows parents how to recognise the qualities in their child that predict genius – creativity, motivation, determination, imagination and the willingness – and build on these essential foundations regardless of which field their talents lie in.

Give children the best possible start with techniques to aid their ability to speak, count, write, solve problems, and progress well at school. Let educational expert Ken Adams teach you how to support your child's learning with practical exercises, fun activities and ideas for interactive play.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Meis that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective Peopleto a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too

early to teach someone how to live well.
