Get Free The Reasons For The Seasons A Seasons for KS1 children | Spring ...

The tilt of the Earth's AXIS is the most important reason why seasons occur. We have hot summers and cold winters because of the tilt of the

Get Free The
Reasons For
Earth's axis. A
The tilt of the
Earth means the
Earth will lean
towards the Sun
(Summer) or lean
away from the
Sun (Winter) 6
months later. In
between these,
Spring and
Autumn will
occur.

Instead, the
seasons are
caused by the
Earth being
tilted on its
axis by an
average of 23.5
degrees (Earth's
tilt on its axis
actually varies
from near 22

Get Free The Reasons For

degrees to 24.5 degrees). Here's how it works:

The Earth has an elliptical orbit around our Sun.

What Causes the Seasons? -
National Weather Service

The earth's spin axis is tilted

Get Free The Reasons For

with respect to
its orbital
plane. This is
what causes the
seasons. When
the earth's axis
points towards
the sun, it is
summer for that
hemisphere. When
the earth's axis
points away,
winter can be
expected.
