This comprehensive study of the Odyssey sees in meat and meat consumption a centre of gravitation for the interpretation of the poem. It aims to place the cultural practices represented in the poem against the background of the (agricultural) lived reality of the poem's audiences in the archaic age, and to align the themes of the adventures in Odysseus' wanderings with the events that transpire at Ithaca in the hero's absence. The criminal meat consumption of the suitors of Penelope in the civilised space of Ithaca is shown to resonate with the adventures of Odysseus and his companions in the pre-cultural worlds they are forced to visit. The book draws on folklore studies, the anthropology of hunting cultures, the comparative study of oral traditions, and the agricultural history of archaic and classical Greece. It will also be of interest to narratologists and students of folklore and Homeric poetics.

Wonder Woman, Amazon Princess; Asterix, indefatigable Gaul; Ozymandias, like Alexander looking for new worlds to conquer. Comics use classical sources, narrative patterns, and references to enrich their imaginative worlds and deepen the stories they present. Son of Classics and Comics exploresthat rich interaction. This volume presents thirteen original studies of representations of the ancient world in the

medium of comics. Building on the foundation established by their groundbreaking *Classics and Comics* (OUP, 2011), Kovacs and Marshall have gathered a wide range of studies with a new, global perspective. Chapters are helpfully grouped to facilitate classroom use, with sections on receptions of Homer, on manga, on Asterix, and on the sense of a 'classic' in the modern world. All Greek and Latin are translated. Lavishly illustrated, the volume widens the range of available studies on the reception of the Greek and Roman worlds in comics significantly, and deepens our understanding of comics as a literary medium. *Son of Classics and Comics* will appeal to students and scholars of classical reception as well as comics fans.

A retelling of how Odysseus and his companions outwit the giant one-eyed Cyclops and escape from his cave.

Which is more dangerous, a gun or a swimming pool? What do schoolteachers and sumo wrestlers have in common? How much do parents really matter? These may not sound like typical questions for an economist to ask. But Steven D. Levitt is not a typical economist. He studies the riddles of everyday life--from cheating and crime to parenting and sports--and reaches conclusions that turn conventional wisdom on its head. *Freakonomics* is a groundbreaking collaboration between Levitt and Stephen J. Dubner, an award-winning author and journalist. They set out to explore the inner workings of a crack gang, the truth about real estate agents, the secrets of the Ku Klux Klan, and much more. Through forceful storytelling and wry insight, they show that economics is, at root, the study of incentives--how people get what they want or need, especially when other people want or need the same thing.
